### Director's Tip of the Month.

N/S enter contracts and scores into the Bridgemates. E/W must verify that the entry is correct. If E/W don't verify the score, or don't get a chance to verify it, please call the director at once. The director will verify the entry at the computer.

Once a score is entered and verified any change requires clear and convincing evidence. The best evidence is a statement from the pair whose score is being reduced. What is written on your score sheet and your partner's is not sufficient if your score is to be increased.
